

## AMENDMENTS TO THE CLAIMS

---

Claims 1-14 (Withdrawn)

15. (Currently Amended) A dispensing system for dispensing wet wipes comprising:

a dispenser, ~~the dispenser exerting a dispensing force;~~  
wet wipes, the wet wipes having a length and a width; and  
a gap, the gap allowing for dispensing of the wet wipes; and  
~~wet wipes, the wet wipes having a length and a width, the dispenser and~~  
wet wipes together having a dispensing force, and the wet wipes having a tensile strength which is at least twice that of the dispensing force.

16. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength at least five times that of the dispensing force.

17. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength at least seven times that of the dispensing force.

18. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength along the length of at least 300 g/in.

19. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength along the length between about 300 and 600 g/in.

20. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength along the width of at least 250 g/in.

21. (Original) The dispensing system of claim 15, wherein the wet wipes have a tensile strength along the width of between about 250 and 500 g/in.

22. (Original) The dispensing system of claim 15, wherein the wet wipes have a peel force, the peel force contributing to the dispensing force.

23. (Original) The dispensing system of claim 15, wherein the wet wipes have a peel force between about 18 and 70 g/in.

24. (Original) The dispensing system of claim 15, wherein the wet wipes have a peel force between about 20 and 40 g/in.

25. (Original) The dispensing system of claim 15, wherein the dispenser contributes to the dispensing force such that the dispensing force is between about 20 and 150 g/in.

26. (Original) The dispensing system of claim 15, wherein the dispenser contributes to the dispensing force such that the dispensing force is between about 30 and 60 g/in.

27. (Original) The dispensing system of claim 15, wherein the dispenser contributes to the dispensing force such that the dispensing force is less than about 47 g/in.

28. (Original) The dispensing system of claim 15, wherein the wet wipes are configured in a roll.

29. (Original) The dispensing system of claim 15, wherein the wet wipes are configured in a roll, the roll being coreless.

30. (Original) The dispensing system of claim 15, wherein the wet wipes comprise perforations.

31. (Currently Amended) A dispensing system for dispensing wet wipes comprising:

a dispenser, ~~the dispenser exerting a dispensing force;~~

wet wipes, the wet wipes having perforations; and

a gap, the gap allowing for dispensing of the wet wipes; and

wet wipes, the wet wipes having perforations, the dispenser and wet wipes together having a dispensing force, and the wet wipes having a detach strength which is at least twice that of the dispensing force.

32. (Original) The dispensing system of claim 31, wherein the wet wipes are configured in a roll.

33. (Original) The dispensing system of claim 31, wherein the wet wipes are configured in a roll, the roll being coreless.

34. (Original) The dispensing system of claim 31, wherein the wet wipes comprise perforated sheets.

35. (Original) The dispensing system of claim 31, wherein the wet wipes have perforations, the perforations having a bond length, a cut length, and a bond spacing.

36. (Original) The dispensing system of claim 31, wherein the wet wipes have perforations, the perforations having a bond length of 0.01 inches, a cut length of 0.03 inches, and a bond spacing of 0.04 inches.

37. (Original) The dispensing system of claim 31, wherein the wet wipes have perforations, the perforations having a bond length of 0.02 inches, a cut length of 0.05 inches, and a bond spacing of 0.07 inches.

38. (Original) The dispensing system of claim 31, wherein the wet wipes have perforations, the perforations having a bond length of 0.04 inches, a cut length of 0.09 inches, and a bond spacing of 0.13 inches.

39. (Original) The dispensing system of claim 31, wherein the wet wipes have a detach strength at least five times that of the dispensing force.

40. (Original) The dispensing system of claim 31, wherein the wet wipes have a detach strength at least seven times that of the dispensing force.

41. (Original) The dispensing system of claim 31, wherein the wet wipes have a tensile strength along the length of at least 300 g/in.

42. (Original) The dispensing system of claim 31, wherein the wet wipes have a tensile strength along the length between about 350 and 500 g/in.

43. (Original) The dispensing system of claim 31, wherein the dispenser contributes to the dispensing force such that the dispensing force is between about 20 and 150 g/in.

44. (Original) The dispensing system of claim 31, wherein the dispenser contributes to the dispensing force such that the dispensing force is between about 30 and 60 g/in.

45. (Original) The dispensing system of claim 31, wherein the dispenser contributes to the dispensing force such that the dispensing force is less than about 47 g/in.

Claims 46-94 (Withdrawn)
